	   i) Website header
	   ii) Website footer
	   iii) About section
	   iv) Navigation bar
	   v) Clickable buttons
	   vi) External linking
	   vii) Internal linking
	   viii) Catalogue
	   ix) Images
	   x) Description
	   xi) Slideshow
	   xii) Animated buttons
	   xiii) Marquee images
	   xiv) Social media links

	xv) User Email xvi) Contact information xvii) Password secured - xviii) Copyright infringements xix) Functionality xx) Portfolio xxi) Cv download 4) Communication between web pages : Yes 5) Number of functionalities : 40
Lower level Approach to be followed: Share the details in points	1) We have a login and signup page with email and password where we put form validation 2) Our password is mixture Uppercase,lowercase, numerical, symbols where until the email and password is not correct you cannot enter the site 3) In the sign up we have confirm email option so if the user cannot put same id he is shown as inncorrect 4) We have given special focus on the cars that are shown in car rent section 5) We have made a proper gallery of cars where we put slideshow of images 6) Then we put photos of car marquee 7) We have form validation again during the books car registion form 8) We have given proper linking to our links like connecting google maps on Chitkara university , mail us to send email, call us to send call 9) In the contact us page we added message option which directly take us to the whatsapp option to message us directly 10) We also show that after clicking the profile tab the user goes to the CV of a that person where we have also put download section to download CV 11) Inside CV we mainly focus on our hovering effects to create some awesome look
Advantage of the project with applicability: Highlight the unique feature(s) of the project if any	- Online choices are fascinating. You can find different Cars of different brands all of them in the same place. - You can view all the latest Rent Charge of different Cars. - Most people don't like crowded places when shopping mostly during special events they happen to be hectic. . - Easier to Book a Car Online. - Directly options available to email ,call and whatsapp us

Schedule for implementing the use case: • Share the Tentative Date of Completion of Expected Deliverables	Deliverable	Expected Date of Completion
	Design layout	27/03/2021
	HTML	29/03/2021
	Javascript	20/04/2021
	Final testing	01/05/2021
Future scope of the project • Share the details in points	1. It can be converted to mobile application 2. It can be simple to use and contact us. 3. It can be big platform for online car rental .
